Product Description

⚡ Specifications

Rated Power	240W
Cell Efficiency	23%
Open Circuit Voltage	24.6V
Short Circuit Current	12.3A
Maximum Operating Voltage	20.5V
Maximum Operating Current	11.7A
IP Grade	IP65
Working Temperature	-4°F~185°F (-20°C~85°C)
Dimension	Folded: 26.18*23.23*2.36in (665*590*60mm)
	Unfolded: 99.57*23.23*1.38in (2529*590*35mm)
Net Weight	19.84lb (9kg)

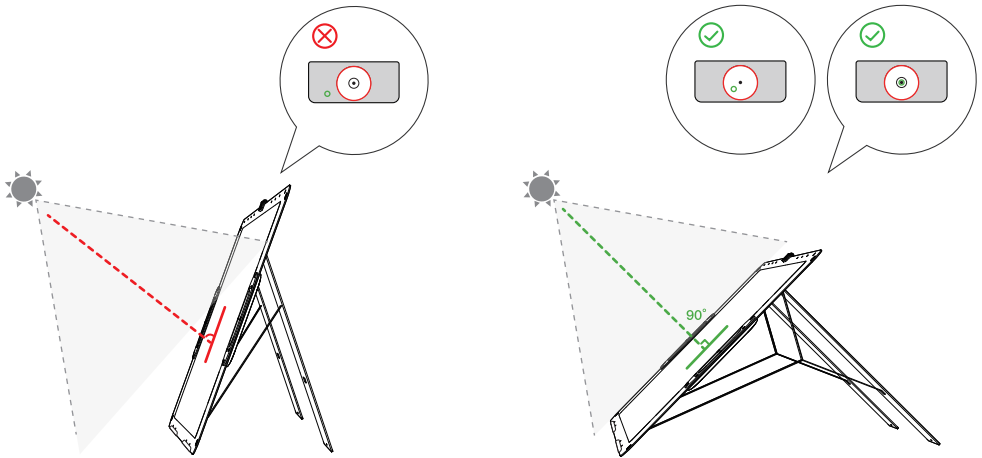

Product Description

⚡ Overview

Instructions for Use

- 1 Undo all button straps, unfold the solar panels and spread the brackets.
- 2 Attach sundial indicator on the top of photovoltaic module.
- 3 Adjust the solar panel to focus sunlight within the sundial indicator's circle for optimal illumination at its center.
- 4 Connect the solar panel to the portable power station and start charging.

Connection and Calculation Method

⚡ In Series

Please connect solar panels in same specifications, and it is recommended to connect solar panels in same specifications.

	In Series	Example
Total Voltage	Adds up	$24.6V \times 3$
Total Current	Same as single solar panel	12.3A
Total Power	Total Voltage*Total Current	$24.6V \times 3 \times 12.3A$

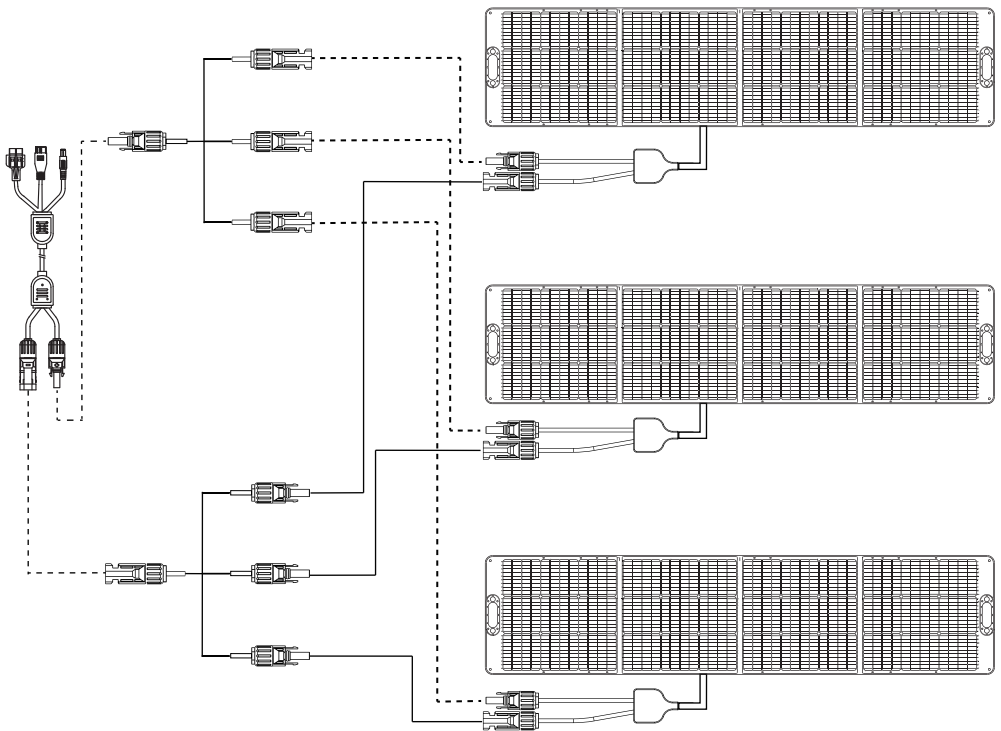

Connection and Calculation Method

⚡ In Parallel

Please connect solar panels in same specifications, and it is recommended to connect solar panels in same specifications.

	In Parallel	Example
Total Voltage	Same as single solar panel	24.6V
Total Current	Adds up	12.3A*3
Total Power	Total Voltage*Total Current	24.6V*(12.3A*3)

1.How to clean the product?

Please use a dry, soft, clean cloth or paper towel to gently wipe the product.

2.How to maintain the product?

- (1) Please store the solar panel in dry and neat place.
- (2) Avoid placing heavy objects on the solar panel.
- (3) Avoid damaging the surface and cable, like scratching, erosion, bump and so on.

Compliance and Certification

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Notice:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- (1) Reorient or relocate the receiving antenna.
- (2) Increase the separation between the equipment and receiver.
- (3) Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- (4) Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
